

Amtelco Secure Messages Android® App

Major/minor version: **7.0**

Revision: **7.0.6.4**

Status: **General Release** [01/23/2025]

Changes: Fixes an issue with Amtelco web links (miTeamWeb) not auto logging in for 7.0.

Fixes an issue with the Do Not Disturb permission dialog not being scrollable on huge font sizes.

Fixes an issue with OnCall messages showing FWD: in the subject and {forwardMessage} in the body (caused by a navigation library update).

A check has been added to prevent sending unnecessary calls to GetThreads after push notification tap.

Fixes an issue when selecting a new message push where the user is not taken to the selected thread.

Added padding and the ability to move the group name for a shared device login.

Removed the getMessageCounts call from the drawer.

Changed the pagination from 50 to 25.

Fixed an issue with the Phone Dialer text box being difficult to tap for copy/paste.

Removed "Current Passcode" for users changing their passcodes when it was previously blank.

Added padding to the bottom of the Away Message.

Fixes an issue with Quick Phrases not previously updating immediately after a silent push.

Fixes an issue with the subject line for forwarded messages not being consistent.

Fixes an issue with the Toggle Personal Circle action in Contact Details being pushed off the screen.

Fixes an issue with toggling between Normal and High Priority state previously changing the hue.

Fixes an issue that now allows a long press on text to select/complete the message.

Fixes an issue to prevent navigating to Contacts causing notifications to call the server multiple times.

Adjusted the New Message push that previously indicated .."new misecure message".

Fixes an issue with where the Circle 'select all' did not previously work if the circle was only roles.

Fixes an issue where the Inbox contact icon had been visible on threads where the Roles feature is not allowed.

Fixes an issue where the thread's latest message had not been updated when the message notification was received.

Fixes an issue when forwarding a system message where the sender had been labeled "unknown".

Fixes an issue with the user switching roles where the message orientation in the thread hadn't been switched accordingly.

System messages have been made selectable.

Revision: **7.0.5.3**

Status: **General Release** [07/26/2024]

Changes: Implemented rebranding of miSecure Messages to Amtelco Secure Messages.

Implemented support for role-based messaging (in advance of ASM server 7.0).

Implemented new administrative permissions.

Added the ability to dial any number via Genesis / Infinity Protected Dialing.

Added the ability to copy and paste email addresses, phone numbers and URLs.

Revision: **7.0.0.11**

Status: **General Release** [05/09/2023]

Changes: Adds Do Not Disturb override

Adds event tracking to determine if and how the user may have modified the incoming notification channel.

Adds Firebase crashlytics/analytics.

Removes App Center diagnostics/analytics.

Adds 'Forgot passcode' links.

Fixes an issue with unexpected behaviors in a personal circle when going between 0 and 1 member.

Fixes an issue where forwarding a message with "%" character could previously cause the app to halt.

Fixes an issue where Spectralink phones could not access the new app from the Play Store.

Fixes an issue where clicking a system MSM notification banner could cause the app to halt.

Fixes an issue with intermittent instances of the app halting when the passcode dialog opens.

Resolved a previous limitation where the Notification Interval setting had a max value of 59:59.
