Status: Interim revision

Changes: Updated NCC to v3.1. 3747.23774

Revision: **5.51.3659.08**

Status: **General Release** [03/16/2010]

Changes: Updated NCC to v3.1.3715.17534

Directory

Fixed Listing editing of Description field on newly created subjects. Previously the Description field was disabled until you added a Description Template.

Revision: **5.51.3659.07**

Status: Interim revision

Changes: Updated Directory Control to v3.1.3659.3

Fixes a problem when copying an oncall shift, changing the month would cause the date to auto select.
Possible fix for slow directories - Changed the way messages are retrieved. Instead of retrieving the messages and message counts, only the message counts are initially retrieved now.

Revision: **5.51.3659.06**

Status: Interim revision

Changes: Updated NCC to v3.1.3705.20590

Updated ISRtiSetup to v5.51.3659.1

Added logging settings

Solved error when adding new RTI Device

Updated Directory Control to v3.1.3659.2

Fixed an issue in DirectoryData.dll where the covering oncall listings client ID was missing. This is only a problem in ISWeb messaging.

Fixed an issue when assigning a shift the shiftrole was not getting reselected.

Fixed an issue assigning a shift and copying to multiple days when the shift has multiple roles. This is only a problem in ISWeb.

Fixed a permission in ISWeb Oncall when doing a Contact Search.

Changed Appointment Search so the assign button will close the form if all roles are assigned. If all roles are not assigned then it will continue to an assignment widget.

Added insert/delete keyhandlers for oncall shift list, day, week and month display.

Changed script passing of roles and listings so if the listings are less than the number of roles, the remaining roles will not be assigned. Previously if the number of roles did not match the number of listings passed then nothing would get selected when creating a shift.

Changed script passed roles and listings so the listings will always be selected. Previously after a shift was created the passed listings were no longer selected.

IS Transforms

Supports Transforming Pinnacle Scripts

Revision: **5.51.3659.05**

Status: Interim revision

Changes:

Updated NCC to v3.1.3687.26813

Updated Dir Control to v3.1.3659.1
