Revision: **5.51.01**

Status: **General Release** [01/30/2009]

Changes: Changed version number to match appropriate Infinity server version.

Fixed Access database date issue for non-American standard locales.

Fixed Message Search print, save-to-file, and preview to include ALL dialout history.

Added code to make Network Archiver a "stand-alone". This should help with auto-imports that start while Network Archiver is already in use.

Fixed pop-up error when entering "DB Maint" from Main screen and using a SQL database.

Fixed SQL database creation that fails, yet claims success.
