

# Infinity Voice Logger [Service]

Major/minor version: **1.01**

---

Revision: **1.01.17**

Status: **General Release** [02/17/2012]

Changes: Fixed a naming problem with the events in the event viewer.

Revision: **1.01.16**

Status: Interim revision

Changes: Fixed a problem with getting an error writing a file not closing the file. This would result in no more recordings being processed.

Revision: **1.01.15**

Status: Interim revision

Changes: Compatible with 5.60.06 and greater

Added the Response and RestoreNetwork timeouts to the configuration screen.

Updated Amtelco.Infinity.Common.

Revision: **1.01.14**

Status: Interim revision

Changes: Updated amtelco.core

Created registry field for "ResponseTimeout".

Number of seconds that the network will wait for a response. Typically 30.

Created registry field for "RestoreNetwork".

Number of milliseconds that the logger server will wait before trying to restore the network connection. (Typically 15000.)

Revision: **1.01.13**

Status: Interim revision

Changes: Converted the database so that the ANI field is 15 digits rather than 12.

Revision: **1.01.12**

Status: Interim revision

Changes: Fixed a problem with resetting a fail safe timer when the date and time get sent from the Infinity server. This could cause the network connection to be reset between the application and Infinity.

Revision: **1.01.11**

Status: Interim revision

Changes: Removed references from Saved by taken timestamp option.

Added Blank initials setting in configuration.

Updated Amtelco.Core.dll

Revision: **1.01.10**

Status: **General Release** [08/20/2010]

Changes: Fixed a problem with operator names longer than 8 characters.

Revision: **1.01.09**

Status: Interim revision

Changes: Fixed a problem with not allowing a station number to be greater than 5200.

Revision: **1.01.08**

Status: Interim revision

Changes: Added a network timeout. If the network control does not see an Infinity packet for a timeout setting(default of 30 seconds), it restarts the network.

Revision: **1.01.07**

Status: Interim revision

Changes: Added debugging info to find network problems.

Fixed a problem with the network going away and coming back because of a slow network connection, where the Infinity times out and takes the station offline.

Revision: **1.01.06**

Status: Interim revision

Changes: Fixed a problem with finding the embedded resource files for upgrades

Revision: **1.01.05**

Status: Interim revision

Changes: Fixed a problem when running on 5.50.xx. Object not set to instance of an object error.

Revision: **1.01.04**

Status: Interim revision

Changes: Added a registry setting called CmdTimeout. This string value can be added to the registry to change the default timeout of 5 seconds for all database commands.

Revision: **1.01.03**

Status: Interim revision

Changes: Fixed setup including embedded sql scripts for upgrading database.

Revision: **1.01.02**

Status: Interim revision

Changes: Converted to visual studio 2008.

Moved Logger specific stuff out of Amtelco.Infinity.Common into Amtelco.Infinity.Logger

Revision: **1.01.01**

Status: Interim revision

Changes: Created a secondary Logger flag. This will allow 2 Unity Loggers on one system. The one flagged as the secondary will pull messages from the LOGGER2-ACCT# in the system configuration.

Revision: **1.01.00**

Status: Interim revision

Changes: Compatible with v5.60.xx and greater Infinity.

Will now report to the Infinity server when the backup file location is switched too.

Will now switch back to the primary location if the secondary file location fails.

Revision: **1.00.16**  
Status: Interim revision  
Changes: Made compatible with windows 2008 server, and 64 bit machines.

Revision: **1.00.15**  
Status: Interim revision  
Changes: Added the original account to the logger database.
